CONTENTS OF VOLUME 114

NUMBER 1, 25 JULY 1977

KENNELL, D. and RIEZMAN, H., Transcription and Translation Initiation Frequencies of the *Escherichia coli lac* Operon 1

SACHSENHEIMER, W. and SCHULZ, G. E., Two Conformations of Crystalline Adenylate Kinase 23

PAI, E. F., SACHSENHEIMER, W., SCHIRMER, R. H. and SCHULZ, G. E., Substrate Positions and Induced-fit in Crystalline Adenylate Kinase 37

EILEN, E. and KRAKOW, J. S., Cyclic AMP-mediated Intersubunit Disulfide Crosslinking of the Cyclic AMP Receptor Protein of *Escherichia coli* . . 47

VAN DRIEL, R., Assembly of Bacteriophage T4 Head-related Structures. Assembly of Polyheads *in vitro* 61

MORRIS, V. L, MEDEIROS, E., RINGOLD, G. M., BISHOP, J. M. and VARMUS, H. E., Comparison of Mouse Mammary Tumor Virus-specific DNA in Inbred, Wild and Asian Mice, and in Tumors and Normal Organs from Inbred Mice 73

BROWNLEE, G. G. and CARTWRIGHT, E. M., Rapid Gel Sequencing of RNA by Primed Synthesis with Reverse Transcriptase 93

WEAVER, L. H., KESTER, W. R. and MATTHEWS, B. W., A Crystallographic Study of the Complex of Phosphoramidon with Thermolysin. A Model for the Presumed Catalytic Transition Site and for the Binding of Extended Substrates 119

MACLEOD, A. R., WATERSTON, R. H., FISHPOOL, R. M. and BRENNER, S., Identification of the Structural Gene for a Myosin Heavy-chain in *Caenorhabditis elegans* 133

POVIRK, L. F., Localization of Inhibition of Replicon Initiation to Damaged Regions of DNA 141

LACKS, S. and GREENBERG, B., Complementary Specificity of Restriction Endonucleases of *Diplococcus pneumoniae* with Respect to DNA Methylation 153

LETTER TO THE EDITOR

GELINAS, R. E., MYERS, P. A. and ROBERTS, R. J., Two Sequence-specific Endonucleases from *Moraxella bovis* 169

Number 2, 5 August 1977

Levitt, M. and Greer, J., Automatic Identification of Secondary Structure in Globular Proteins 181

Kuwajima, K., A Folding Model of α-Lactalbumin Deduced from the Three-state Denaturation Mechanism 241

Zulauf, M., Swelling of Brome Mosaic Virus as Studied by Intensity Fluctuation Spectroscopy 259

Baici, A. and Luisi, P. L., Further Investigations of the Transient Kinetics of Alcohol Oxidation Catalysed by Horse Liver Alcohol Dehydrogenase . 267

Letter to the Editor

Tschopp, J. and Smith, P. R., Extra-long Bacteriophage T4 Tails Produced under *in vitro* Conditions 281

Number 3, 15 August 1977

Buxton, R. S., Albrechtsen, H. and Hammer-Jespersen, K., Overlapping Transcriptional Units in the *deo* Operon of *Escherichia coli* K-12. Evidence from Phage Mu-l Insertion Mutants 287

Tsai, C-C., Jain, S. C. and Sobell, H. M., Visualization of Drug–Nucleic Acid Interactions at Atomic Resolution. I. Structure of an Ethidium/Dinucleoside Monophosphate Crystalline Complex, Ethidium:5-Iodouridylyl (3′-5′) Adenosine 301

Jain, S. C., Tsai, C-C. and Sobell, H. M., Visualization of Drug–Nucleic Acid Interactions at Atomic Resolution. II. Structure of an Ethidium/Dinucleoside Monophosphate Crystalline Complex, Ethidium:5-Iodocytidylyl (3′-5′) Guanosine 317

Sobell, H. M., Tsai, C-C., Jain, S. C. and Gilbert, S. G., Visualization of Drug–Nucleic Acid Interactions at Atomic Resolution. III. Unifying Structural Concepts in Understanding Drug–DNA Interactions and their Broader Implications in Understanding Protein–DNA Interactions . . 333

Warner, F. D., Mitchell, D. R. and Perkins, C. R., Structural Conformation of the Ciliary ATPase Dynein 367

Ladner, R. C., Heidner, E. J. and Perutz, M. F., The Structure of Horse Methaemoglobin at 2·0 Å Resolution 385

Appendix: Fermi, G., Note on Estimated Error in the Distance between the Iron and the Haem Plane 413

Tucker, P. W. and Perutz, M. F., Mechanism of Charge Compensation and Impairment of Co-operative Functions in Haemoglobin Tacoma (Arg B12(30)β→Ser) 415

Fermi, G. and Perutz, M. F., Structure of Human Fluoromethaemoglobin with Inositol Hexaphosphate 421

Letters to the Editor

Gelinas, R. E., Myers, P. A., Weiss, G. H., Roberts, R. J., and Murray, K. A Specific Endonuclease from *Brevibacterium albidum* . . 433

Endow, S. A., Analysis of *Drosophila melanogaster* Satellite IV with Restriction Endonuclease *Mbo*II 441

Jekowsky, E., Miller, D. L. and Schimmel, P. R., Isolation, Characterization and Structural Implications of a Nuclease-digested Complex of Aminoacyl Transfer RNA and *Escherichia coli* Elongation Factor Tu 451

Announcements 459

Number 4, 25 August 1977

Frederick, R. J. and Snyder, L., Regulation of Anti-late RNA Synthesis in Bacteriophage T4: A Delayed Early Control 461

Fried, V. A., A Novel Mutant of the *lac* Transport System of *Escherichia coli* 477

Unwin, P. N. T. and Taddei, C., Packing of Ribosomes in Crystals from the Lizard *Lacerta sicula* 491

Lauer, G. D., Roberts, T. M. and Klotz, L. C., Determination of the Nuclear DNA Content of *Saccharomyces cerevisiae* and Implications for the Organization of DNA in Yeast Chromosomes 507

Steitz, J. A. and Bryan, R. A., Two Ribosome Binding Sites from the Gene *0·3* Messenger RNA of Bacteriophage T7 527

Steitz, J. and Steege, D. A., Characterization of Two mRNA·rRNA Complexes Implicated in the Initiation of Protein Biosynthesis 545

Letters to the Editor

Steege, D. A., A Ribosome Binding Site from the P_R RNA of Bacteriophage Lambda 559

Cohen, P. S., Lynch, K. R., Walsh, M. L., Hill, J. M. and Ennis, H. L., Use of Antibiotics to Determine Ribosome–Messenger RNA Interactions Necessary for *in vivo* Stability of Specific Messengers . . 569

Aschaffenburg, R., Blake, C. C. F., Burridge, J. M. and Esnouf, M. P., Preliminary X-ray Investigation of Fragment 1 of Bovine Prothrombin 575

Index to Volume 114

Adenylate kinase, crystalline, substrate positions and induced-fit, 37
— —, —, two conformations, 23
Albrechtsen, H. (see also Buxton, R. S.), 287
Alcohol oxidation catalysed by horse liver alcohol dehydrogenase, further investigations of transient kinetics, 267
Aminoacyl tRNA complex with *Escherichia coli* elongation factor Tu, nuclease-digested, isolation, characterization and structural implications, 451
Antibiotics, use in determination of ribosome–mRNA interactions necessary for *in vivo* stability of specific messengers, 569
Arg B12(30)β→Ser; mechanism of charge compensation and impairment of co-operative functions in haemoglobin Tacoma, 415
Aschaffenburg, R., Blake, C. C. F., Burridge, J. M. & Esnouf, M. P., Preliminary X ray investigation of fragment 1 of bovine prothrombin, 575
Assembly of bacteriophage T4 head-related structures; assembly of polyheads *in vitro*, 61
ATPase, ciliary; structural conformation of dynein, 367

Bacteriophage lambda, a ribosome binding site from the P_R RNA, 559
— T4 polyheads, assembly *in vitro*, 61
— —, regulation of anti-late RNA synthesis: a delayed early control, 461
— — tails, extra-long, produced under *in vitro* conditions, 281
— T7, two ribosome binding sites from the gene *0·3* mRNA, 527
Baici, A. & Luisi, P. L., Further investigation of the transient kinetics of alcohol oxidation catalysed by horse liver alcohol dehydrogenase, 267
Binding of phosphoramidon to thermolysin, 119
— site, ribosome, from the P_R RNA of bacteriophage lambda, 559
— sites, ribosome, two, from the gene *0·3* mRNA of bacteriophage T7, 527
Bishop, J. M. (see also Morris, V. L.), 73
Blake, C. C. F. (see also Aschaffenburg, R.), 575
Bovine prothrombin, preliminary X-ray investigation of fragment 1, 575
Brenner, S. (see also MacLeod, A. R.), 133
Brevibacterium albidum: a specific endonuclease, 433
Brome mosaic virus swelling as studied by intensity fluctuation spectroscopy, 259
Brownlee, G. G. & Cartwright, E. M., Rapid gel sequencing of RNA by primed synthesis with reverse transcriptase, 93
Bryan, R. A. (see also Steitz, J. A.), 527
Burridge, J. M. (see also Aschaffenburg, R.), 575
Buxton, R. S., Albrechtsen, H. & Hammer-Jespersen, K., Overlapping transcriptional units in the *deo* operon of *Escherichia coli* K-12. Evidence from phage Mu-1 insertion mutants, 287

Caenorhabditis elegans, identification of the structural gene for a myosin heavy-chain, 133
Cartwright, E. M. (see also Brownlee, G. G.), 93
Charge compensation and impairment of co-operative functions in haemoglobin Tacoma (Arg B12(30)β→Ser), 415
Chromosome structure in *Saccharomyces cerevisiae*, 507
Ciliary ATPase dynein, structural conformation, 367
Cohen, P. S., Lynch, K. R., Walsh, M. L., Hill, J. M. & Ennis, H. L., Use of antibiotics to determine ribosome-messenger RNA interactions necessary for *in vivo* stability of specific messengers, 569
Conformation, structural, of the ciliary ATPase dynein, 367
Conformations, two, of crystalline adenylate kinase, 23
Crosslinking, disulfide, cyclic AMP-mediated, of the cyclic AMP receptor protein of *Escherichia coli*, 47
Crystalline adenylate kinase conformations, 23
— — —, substrate positions and induced-fit, 37
Crystallographic study of the complex of phosphoramidon with thermolysin. A model for the presumed catalytic transition state and for the binding of extended substrates, 119

Crystals from the lizard *Lacerta sicula*, packing of ribosomes, 491
Cyclic AMP-mediated intersubunit disulfide crosslinking of the cyclic AMP receptor protein of *Escherichia coli*, 47

Denaturation mechanism, three-state, used to deduce a folding model of α-lactalbumin, 241
deo operon of *Escherichia coli* K12, overlapping transcriptional units; evidence from phage Mu-1 insertion mutants, 287
DNA, analysis of *Drosophila melanogaster* satellite IV with restriction endonuclease *Mbo*II, 441
— content of nucleus of *Saccharomyces cerevisiae* and implications for the organization of DNA in yeast chromosomes, 507
— –drug interactions; visualization of drug-nucleic acid interactions at atomic resolution, 333
—, localization of inhibition of replicon initiation to damaged regions, 141
— methylation and the complementary specificity of restriction endonucleases of *Diplococcus pneumoniae*, 153
—, mouse mammary tumor-specific, comparison in inbred, wild and Asian mice, and in tumors and normal organs from inbred mice, 73
— –protein interactions; visualization of drug–nucleic acid interactions at atomic resolution, 333
Diplococcus pneumoniae, complementary specificity of restriction endonucleases with respect to DNA methylation, 153
Disulfide crosslinking, intersubunit, cyclic AMP-mediated, of the cyclic AMP receptor protein of *Escherichia coli*, 47
Drosophila melanogaster satellite IV, analysis with endonuclease *Mbo*II, 441
Drug–nucleic acid interactions; visualization at atomic resolution; structure of an ethidium/dinucleoside monophosphate crystalline complex, ethidium:5-iodouridylyl(3′-5′)adenosine, 301
— – — — —, — — — —; — — — / — — — —, —: — — guanosine, 317
— – — — —, — — — —; unifying structural concepts in understanding drug–DNA interactions and their broader implications in understanding protein–DNA interactions, 333
Dynein, ciliary ATPase, structural conformation, 367

Eilen, E. & Krakow, J. S., Cyclic AMP-mediated intersubunit disulfide crosslinking of the cyclic AMP receptor protein of *Escherichia coli*, 47
Elongation factor Tu of *Escherichia coli*, isolation, characterization and structural implications of nuclease-digested complex with aminoacyl tRNA, 451
Endonuclease *Mbo*II analysis of *Drosophila melanogaster* satellite IV, 441
—, restriction, of *Diplococcus pneumoniae*, complementary specificity with respect to DNA methylation, 153
—, specific, from *Brevibacterium albidum*, 433
Endonucleases, sequence-specific, two, from *Moraxella bovis*, 169
Endow, S. A., Analysis of *Drosophila melanogaster* satellite IV with restriction endonuclease *Mbo*II, 441
Ennis, H. L. (see also Cohen, P. S.), 569
Escherichia coli, cyclic AMP-mediated intersubunit disulfide crosslinking of the cyclic AMP receptor protein, 47
— — elongation factor Tu complex with aminoacyl tRNA, nuclease-digested, isolation, characterization and structural implications, 451
— — K-12, overlapping transcriptional units in the *deo* operon; evidence from phage Mu-1 insertion mutants, 287
— — *lac* operon, transcription and translation initiation frequencies, 1
— —, a novel mutant of the *lac* transport system, 477
Esnouf, M. P. (see also Aschaffenburg, R.), 575
Ethidium:5-iodouridylyl (3′-5′) adenosine complex, structure, 301
—: — — guanosine complex, structure, 317

Fermi, G., Note on estimated error in the distance between the iron and the haem plane (*Appendix* to Ladner, R. C. *et al.*, 385), 413
—. & Perutz, M. F., Structure of human fluoromethaemoglobin with inositol hexaphosphate, 421
Fishpool, R. M. (see also MacLeod, A. R.), 133
Fluoromethaemoglobin, human, with inositol hexaphosphate, structure, 421
Folding model of α-lactalbumin deduced from the three-state denaturation mechanism, 241
Frederick, R. J. & Snyder, L., Regulation of anti-late RNA synthesis in bacteriophage T4· a delayed early control, 461
Fried, V. A., A novel mutant of the *lac* transport system of *Escherichia coli*, 477

Gel sequencing, rapid, of RNA by primed synthesis with reverse transcriptase, 93
Gelinas, R. E., Myers, P. A. & Roberts, R. J., Two sequence-specific endonucleases from *Moraxella bovis*, 169
—, —, Weiss, G. H., Roberts, R. J. & Murray, K., A specific endonuclease from *Brevibacterium albidum*, 433
Gene *0·3* mRNA of bacteriophage T7, two ribosome binding sites, 527
—, structural, identification for a myosin heavy-chain in *Caenorhabditis elegans*, 133
Gilbert, S. G. (see also Sobell, H. M.), 333
Globular proteins, automatic identification of secondary structure, 181
Greenberg, B. (see also Lacks, S.), 153
Greer, J. (see also Levitt, M.), 181

Haem plane, note on estimated error in the distance between it and the iron atom, 413
Haemoglobin Tacoma (Arg B12(30)β→Ser), mechanism of charge compensation and impairment of co-operative functions, 415
Hammer-Jespersen, K. (see also Buxton, R. S.), 287
Heavy-chain, myosin, in *Caenorhabditis elegans*, identification of the structural gene, 133
Heidner, E. J. (see also Ladner, R. C.), 385
Hill, J. M. (see also Cohen, P. S.), 569
Horse liver alcohol dehydrogenase catalysis of alcohol oxidation, further investigations of transient kinetics, 267
— methaemoglobin, structure at 2·0 Å resolution, 385
Human fluoromethaemoglobin with inositol hexaphosphate, structure, 421

Induced-fit and substrate positions in crystalline adenylate kinase, 37
Inhibition of replicon initiation, localization to damaged regions of DNA, 141
Initiation frequencies, transcription and translation, of the *Escherichia coli lac* operon, 1
— of protein biosynthesis, characterization of two implicated mRNA·rRNA complexes, 545
— — replicons, inhibition localized to damaged regions of DNA, 141
Inositol hexaphosphate with human fluoromethaemoglobin, structure, 421
Intensity fluctuation spectroscopy, use in study of swelling of brome mosaic virus, 259
Iron atom, note on estimated error in the distance between it and the haem plane, 413

Jain, S. C., Tsai, C-C. & Sobell, H. M., Visualization of drug–nucleic acid interactions at atomic resolution. II. Structure of an ethidium/dinucleoside monophosphate crystalline complex, ethidium:5-iodocytidylyl (3′-5′) guanosine, 317
— (see also Sobell, H. M.), 333
— (see also Tsai, C-C.), 301

Lizard, *Lacerta sicula*, packing of ribosomes in crystals, 491
Luisi, P. L. (see also Baici, A.), 267
Lynch, K. R. (see also Cohen, P. S.), 569

MacLeod, A. R., Waterston, R. H., Fishpool, R. M. & Brenner, S., Identification of the structural gene for a myosin heavy-chain in *Caenorhabditis elegans*, 133
Mammary tumor virus-specific DNA of mice, comparison in inbred, wild and Asian mice, and in tumors and normal organs from inbred mice, 73
Matthews, B. W. (see also Weaver, L. H.), 119
*Mbo*II analysis of *Drosophila melanogaster* satellite IV, 441
Medeiros, E. (see also Morris, V. L.), 73
Messenger RNA, gene *0·3*, of bacteriophage T7, two ribosome binding sites, 527
— — ribosome interactions necessary for *in vivo* stability of specific messengers, use of antibiotics to determine, 569
mRNA·rRNA complexes, two, implicated in the initiation of protein biosynthesis, characterization, 545
Methaemoglobin of horse, structure at 2·0 Å resolution, 385
Methylation of sites in DNA, and the complementary specificity of restriction endonucleases of *Diplococcus pneumoniae*, 153
Miller, D. L. (see also Jekowsky, E.), 451
Mitchell, D. R. (see also Warner, F. D.), 367
Moraxella bovis, two sequence-specific endonucleases, 169
Morris, V. L., Medeiros, E., Ringold, G. M., Bishop, J. M. & Varmus, H. E., Comparison of mouse mammary tumor virus-specific DNA in inbred, wild and Asian mice, and in tumors and normal organs from inbred mice, 73
Mouse mammary tumor virus-specific DNA, comparison in inbred, wild and Asian mice, and in tumors and normal organs from inbred mice, 73
Mu-1 insertion mutants provide evidence for overlapping transcriptional units in the *deo* operon of *Escherichia coli* K-12, 287
Murray, K. (see also Gelinas, R. E.), 433
Mutant, novel, of the *lac* transport system of *Escherichia coli*, 477
Mutants, insertion, Mu-1, provide evidence for overlapping transcriptional units in the *deo* operon of *Escherichia coli* K-12, 287
Myers, P. A. (see also Gelinas, R. E.), 169, 433
Myosin heavy-chain in *Caenorhabditis elegans*, identification of the structural gene, 133

Nuclear DNA content of *Saccharomyces cerevisiae* and implications for the organization of DNA in yeast chromosomes, 507

Oxidation, alcohol, catalysed by horse liver alcohol dehydrogenase, further investigations of the transient kinetics, 267

P_R RNA of bacteriophage lambda, a ribosome binding site, 559
Packing of ribosomes in crystals from the lizard *Lacerta sicula*, 491
Pai, E. F., Sachsenheimer, W., Schirmer, R. H. & Schulz, G. E., Substrate positions and induced-fit in crystalline adenylate kinase, 37
Perkins, C. R. (see also Warner, F. D.), 367
Perutz, M. F. (see also Fermi, G.), 421
— (see also Ladner, R. C.), 385
— (see also Tucker, P. W.), 415
Phosphoramidon, a crystallographic study of the complex with thermolysin. A model for the presumed catalytic transition state and for the binding of extended substrates, 119
Polyheads, bacteriophage T4, assembly *in vitro*, 61
Povirk, L. F., Localization of inhibition of replicon initiation to damaged regions of DNA, 141
Protein biosynthesis initiation, characterization of two implicated mRNA·rRNA complexes, 545
—, cyclic AMP receptor, of *Escherichia coli*, cyclic AMP-mediated intersubunit disulfide cross-linking, 47
— DNA interactions and their understanding in terms of structural concepts of drug–nucleic acid interactions, 333
Proteins, globular, automatic identification of secondary structure, 181
Prothrombin, bovine, preliminary X-ray investigation of fragment 1, 575

Regulation of anti-late RNA synthesis in bacteriophage T4: a delayed early control, 461
Replicon initiation inhibition, localization to damaged regions of DNA, 141
Restriction endonuclease *Mbo*II analysis of *Drosophila melanogaster* satellite IV, 441
— endonucleases of *Diplococcus pneumoniae*, complementary specificity with respect to DNA methylation, 153
RNA, anti-late, synthesis regulation in bacteriophage T4: a delayed early control, 461
— characterization of two mRNA·rRNA complexes implicated in the initiation of protein biosynthesis, 545
—, gene *0·3* messenger, of bacteriophage T7, two ribosome binding sites, 527
—, P_R, of bacteriophage lambda, a ribosome binding site, 559
—, rapid gel sequencing by primed synthesis with reverse transcriptase, 93
—, use of antibiotics to determine ribosome–mRNA interactions necessary for *in vivo* stability of specific messengers, 569
Ribosome binding site from the P_R RNA of bacteriophage lambda, 559
— — sites, two, from the gene *0·3* mRNA of bacteriophage T7, 527
— –mRNA interactions necessary for *in vivo* stability of specific messengers, use of antibiotics to determine, 569
— packing in crystals from the lizard *Lacerta sicula*, 491
rRNA·mRNA complexes, two, implicated in the initiation of protein biosynthesis, characterization, 545
